Prairie West Terminal To Expand Storage

The Board of Directors of Prairie West Terminal Ltd. (PWT) have entered into a design – build contract with Flynn Bros. Contracting Inc. to construct a turnkey expansion of 15,225 metric tonnes at the high through-put grain handling facility located between the villages of Doddsland and Plenty, Saskatchewan. The design – build contract includes three 5075 metric tonne commercial grain tanks, site work, engineered foundations, piping, and distribution fixtures. Upon completion of the expansion the grain storage capacity of the high through-put facility will be 46,740 mt and PWT's total storage capacity in West Central Saskatchewan will be approximately 78,170 mt

The seven month construction project is expected to begin on June 30, 2010. The total cost of the expansion will be approximately of \$4.1 million dollars. PWT will finance the Project through a combination of working capital and new term debt.

“The additional storage is a continuation of our corporate plan to expand the company's core business of handling grain. The concrete terminal is the flag ship of our asset base and our capital investment over the last 12 months had greatly improved our competitiveness in the market now and in the future” stated Chief Executive Officer, Andrew Travers.

Prairie West Terminal Ltd. is a locally owned and operated grain company, with locations in Kinderlsey, Luseland, Doddsland, Plenty. The concrete high through put terminal and the corporate head office are located between the villages of Doddsland and Plenty, Saskatchewan.
